Eastwood Elem
4th Grade

Aiden

If I were Mayor I would save trees and stop constraction guys from destroying them. Another thing I would do is get rid of all the stink bugs. Another thing I would do is serve ice cream at school every day. Then I would pay more attention to wild life, such as making zoos. I would also make a cancer center where they try to make cures for cancer. Then I say every house must use solar energy for electricity and you don't buy the solar for 1,000 dollars. You pick it up at the court house! for 50 dollars. If you paid a hundred dollars then the electric company comes and installs it in your root. Then I would give the police station new equipment that they could use when they needed to. Then I would make sure every body had homes to live in and if they didn't then I would give them a chance to live in a home. Thats what I would do if I were mayor.
