

IF I were Mayor I would build more statues of animals. I would also reduce the amount of shopping in Morgantown, while also increasing the amount of arcades. Taxes would be lower and clothes would be cheaper. I would make my own business. It would be like making movies, but more like some electronic photo albums. I would have really good builders so buildings would be more sturdy.

I would also invent new arcade games like, Frogger 2, and Temple Run 3. There would also be more spaces for exercise and less highly complex playgrounds. At swimming pools there would be a splash zone for kids ages 3-6. In the splash zone there would be a tub for playing in and there

In the park I would build a statue of a Mountaineer with a musket shooting out water. I would build a pool with a water zone I talked about earlier. The storage buildings would have electricity. School lunch schedules would be made by the cooks. The students in school get recess twice a day.
