

If I Were the Mayor of Morgantown for a day

by

Connor

If I were the mayor of Morgantown for a day I would hold large fundraiser. Also I would hold a local convention to see what to do with the money. I have a few of my own ideas. We should build more shops to make our economy skyrocket and we should give money to researchers to develop medicine to treat lethal viruses and bacteria. I believe that helping our economy and improving our health are two major priorities.

Some other ideas to be considered are building more roads to reduce the traffic congestion and lowering state taxes. Also, I would reinforce the National Guard with more recruits. I would also propose a law to have grass roofs on the tops of houses and ditches on both sides of the house. Installations and materials would be paid for by the city. The ditches would lead to a place to clean the water so it would be safe for people to drink. Funding and other money would go to find healthier ways to make energy such as windmills and solar energy. Another portion of the money would go to the government to help pay city debts. That would be what I would do if I was the mayor of Morgantown for a day.
