3rd Grade

If I were Mayor I would reduce the time it takes to build buildings with more technology and equipment available to builders. I would also build more statues and plagues to honor the important people of Morgantown. I would reduce the tax to make things more affordable like

younger and older kids. I would build more attractions like dome theatres, robot conventions, aquariums and planetariums. I would make it illegal to drive with snow on your car because it could fall off and hit a windshield and make the person crash. I would expand all the training we have for teachers to make a

better school. I would reduce the time it takes to build a building because, if we can build faster we can get more buildings constructed in a short or long time span. I would make construction faster when we get more advanced technology. I would build

we don't do much to honor the important people of Morgan town. I would reduce tax to make things more affordable like cars, food and bussinesses. I would do it because if everything was expensive we wouldn't have anything. I would make more parks for older and younger kids because we don't have a lot. I would have it done

because we need more parks to entertain kids 4 and up. I would build more attractions like dome theatres, robot conventions, aquariums and planetariums. I would do it because their fun and educational. I would make it illegal to drive with snow on your car because it is dangerous

we have for teachers because if they know more their students will know more. So that's what I would do if I were Mayor.
